
Clinical Practice Guideline

Treatment for Attention Deficit Hyperactivity Disorder in Children and Adolescents

Revised / Effective: April 2023

Next Review: March 2025

RECOMMENDATION SUMMARY

The health plan supports the recommendations of the American Academy of Pediatrics for the treatment of Attention Deficit Hyperactivity Disorder. The guideline recommendations apply to those aged 4 through 18 years old.

POSITION STATEMENT

The guideline by the American Academy of Pediatrics guideline is supported by the health plan because it is based on evidence and where evidence is lacking, on expert panel consensus. The guideline reflects the current standard of care and the following:

- The panel members are recognized experts in the field, practicing in a variety of professional settings;
- The recommendations are based on a well-defined, comprehensive scientific literature search;
- The methods used to critically appraise the evidence supporting the guideline recommendations are transparent;

- The guidelines clearly state the strength of the evidence for which recommendations are based.
- Sources of funding for guideline development are reported; and
- Financial disclosures/potential conflicts of interest for individual panel members are reported and managed.

GUIDELINE ADOPTION AND RECOMMENDED USE

This guideline has been adopted based on nationally recognized sources. This guideline is based on the most recent medical evidence or consensus on clinical treatment patterns by physicians in the selected field of practice. The health plan adopts guidelines to assist practitioners and members make decisions about appropriate health care for specific medical conditions. Guidelines are not a substitute for the advice of a physician.

BENEFIT DETERMINATION

Benefit determinations should be based in all cases on the applicable contract coverage. To the extent that there are any conflicts between these guidelines and the contract language, the contract language takes precedence.
